PROFILE

Motivated and detail-oriented Full Stack Developer with 6 months of hands-on industry experience and a strong academic foundation in IT. Skilled in designing, developing, deploying, and maintaining full-stack and mobile applications using React.js, Node.js, Flutter, and MySQL, with exposure to RESTful APIs. Experienced in building responsive user interfaces and scalable back-end solutions that enhance application performance. A collaborative team player with strong problem-solving skills, eager to contribute to dynamic software development projects, apply full-stack expertise, and grow into a long-term role as a Full Stack Developer.

SKILLS AND TECHNOLOGIES

TECHNICAL SKILLS:

- **Programming Languages**: Java, JavaScript, SQL, Python, Dart
- **Web Development**: Node.js, Express.js, React.js, HTML, CSS, Tailwind CSS, Material UI
- **Mobile Development**: Flutter
- **Databases** – MongoDB, MySQL, Firebase
- **Tools and Platforms**: GitHub, VS Code, Android Studio, Eclipse, Visual Studio, Postman, Figma, IntelliJ, Microsoft SQL Server, MySQL workbench

SOFT SKILLS:

- Communication, Teamwork, Strong Decision Maker, Problem-Solving, Time Management

EXPERIENCE

Information Technology Trainee – Software Development July 2024 – Jan 2025
Kelani Cables PLC – Kelaniya, Sri Lanka

- Developed a web-based Quotation Generation System to streamline the creation and management of company quotations, improving operational efficiency.
- Designed and implemented both frontend and backend components using React.js and Express.js, ensuring smooth end-to-end system functionality.
- Integrated the application with a MySQL database, managing data storage, retrieval, and relationships effectively.
- Initially developed the system using the MERN stack, later migrating from MongoDB to MySQL to align with company requirements.
- Implemented RESTful APIs to support quotation creation, updates, and retrieval, ensuring reliable system performance.
- Collaborated with stakeholders to understand business needs and delivered features that met functional requirements within project timelines.

PROJECTS

- **Beauty Cosmetics Store - MERN Stack E-Commerce Web Application** *GitHub Repository*

  - Technologies: React.js, Node.js, Express.js, MongoDB, Supabase
  - Developed a fully responsive cosmetics e-commerce platform with product listing, product details, search bar, categories, cart, checkout, and order placement.
  - Built secure authentication and authorization using JWT, including user login, signup and protected routes.
  - Designed and implemented REST APIs for **users, products, orders, and reviews,** enabling end-to-end CRUD operations.
  - Created a complete **Admin Dashboard** where the admin can **add, update, remove, and view all products**, and view all orders and manage order related details.
  - Designed the entire UI using **Tailwind CSS**, applying reusable React components for clean structure and fast performance.
  - Hosted the **backend** on **Render** and the **frontend** on **Vercel**, ensuring smooth deployment and stable application.

- **Quotation Generation System -** *Company Project*

  - Technologies: React.js, Node.js, Express.js, MySQL
  - Developed a web-based system to create, manage, and store customer quotations efficiently.
  - Implemented role-based access control for Admin and Normal Users.
  - Designed RESTful APIs using Express.js to handle quotation operations.
  - Integrated MySQL database for structured data management after migrating from MongoDB.
  - Built the frontend using React.js with responsive UI components.
  - Deployed the application on a cPanel hosting environment during the project period.

- **Workout Planner Mobile Application (Flutter)** *GitHub Repository*

  - Technologies: Flutter (Dart)
  - Developed a Flutter-based workout planner application to help users plan workouts, track activities, and monitor progress.
  - Implemented state management using setState and Stateful Widgets for dynamic UI updates.
  - Built structured navigation using Bottom Navigation Bar and Navigator.
  - Used ListView to display exercises and equipment with local data handling.

EDUCATION

BSc (Hons) in Information Technology (Specializing in Information Technology) 2021 – 2025
Sri Lanka Institute of Information Technology

CERTIFICATIONS

- Python for Beginners – offered by University of Moratuwa
- Web Design for Beginners - offered by University of Moratuwa
- AWS Academy Graduate - AWS Academy Cloud Foundations
- Machine Learning Using Python - Simplilearn
